## TechStep: Cannot Test Display Cards 4•8, 8•24, 8•24 GC

Article Created: 10 April 1992

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

TOPIC -----

Can I test the Macintosh Display Cards 4•8, 8•24, and 8•24 GC with the Apple TechStep video card test?

DISCUSSION -----

No. The Macintosh Display Cards 4•8, 8•24, and 8•24 GC are not supported in the Apple TechStep video card test. Also, these video cards may cause Test Manager entry problems.

If a Macintosh Display Card 4•8, 8•24, or 8•24 GC is installed in the Macintosh you are testing, power off the system and disconnect the monitor cable from the card before you try to put the computer into Test Manager mode.
