Apple TechStep: Using with Performa 200 and 400

Article Created: 5 November 1992

TOPIC -----

Are there any ROM differences in the Performa 200 and 400 that will prevent Apple TechStep from testing as if they were the same as the Classic II and LC II?

DISCUSSION -----

Because the logic boards and ROMs for the Performa 200 are identical to those in the Macintosh Classic II, and those in the Performa 400 are identical to those in the Macintosh LC II, the Apple TechStep Diagnostic tool can test both Performa models.

The technician just chooses the Classic II or LC II in the Apple TechStep menu, depending on the system being tested.
