

Found this EPROM Programmer in a large box of Apple IIe duplication and utility software that had been stored away in the suspended ceiling of my basement for at least 25 years. My Apple IIe was sold probably 30 years ago. Purchased the EPROM Programming to program EPROMS in the mid 1980's. I never did burn any and to the best of my memory the programmer was NEVER installed in a computer. Listed as used only because I did not have the original packing material and did want to list as new when it is nearly 40 years old .
